

The non-technical script.

So what do you do?

As a BCBA (Board Certified Behaviour Analyst), I objectively look at behaviour to figure out why or why not individuals behave the way they do.

Do they need to do more of something? Maybe they need to do less? Can they access their environment successfully and be their best?

I help with that. I take data. I visually analyze it and determine why and figure out how to overcome obstacles or enhance individual strengths.
